Personnel Manager

Scope:

Create a table to capture (role) hierarchy information, that will be used to populate the agent, team leader and manager lists.

This input table will generate a unique id, that will allow for changes (spelling, ect) to be made without disrupting the data already captured.

The employee id is to better identify and control the person lists for the client and allow for name changes and updates.

It also includes an email and employee id input function.

The email address is for future development that will allow the agent to give feedback via email to the app.

Access:

General Rules:

- Input fields ie. Name, Surname, Email and Employee ID are limited to 50 characters.
- All special characters are allowed in the above fields, excluding quotations characters.
- The 26 letters of the alphabet are allowed in the name and surname fields. Also included are accents such as â, è, ê, ö or ú.
- Numbers are allowed in the name and surname field. We do not recommend using numbers when creating users.
- Only one role per user, per customer (db) can be assigned per person.

Features:

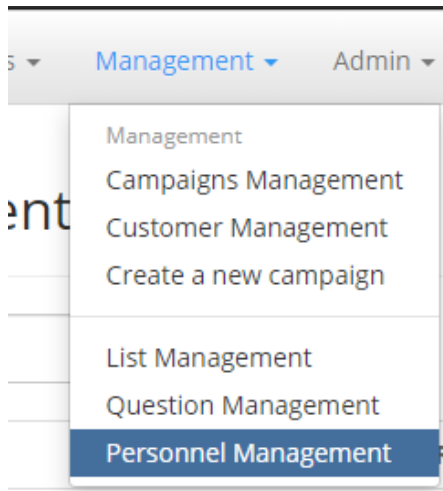

- A unique id will be allocated to each new person automatically
- Email and Employee id are non-compulsory
- Person can be allocated (assigned) to multiple campaigns per customer (db)
- Person can be disabled from list (which will remove them from their respective list, but not reporting.)
- Where name changes were done in the past, resulting in data being split, agent names can now be merged and combining the data.

Future enhancements to be spec:

- Allowing the client access to decide whether non-compulsory fields need to be made compulsory. (Per customer / db)
- Enabling the agent to add feedback via an email loop

Personnel Management View

The Personnel Management will be accessible via the Management Menu.

There are 2 views available as well a menu.

Views:

1. Personnel – shows individual personnel details
2. Campaigns – shows campaign details

Menu:

1. Customer – Will display all databases linked to the clients' app
2. Add Personnel – add single individuals' data
3. Refresh – Reloads page
4. Import – this is for bulk staff imports into a specific campaign
5. Export – allows for exporting of staff data to a .csv file from a specific campaign
6. Merge – allows for the data for two separate individuals to be consolidated. This is to resolve cases resulting from the previous list management tool. Cases resulting from names changes or spelling errors.

Personnel View: Shows the basic detail per individual personnel in a table format including:

1. Name
2. Surname
3. Email
4. Employee ID
5. Role (Agent, Team Leader or Manager)
6. Active (Enabled or Not)

Clicking on either the name or surname (blue script) or selecting the pencil on the right hand side of the table will allow you to edit the selected person.

There is also a delete icon on the right hand side of the table, however you will only be able to delete a person if there are no captures associated to that person.

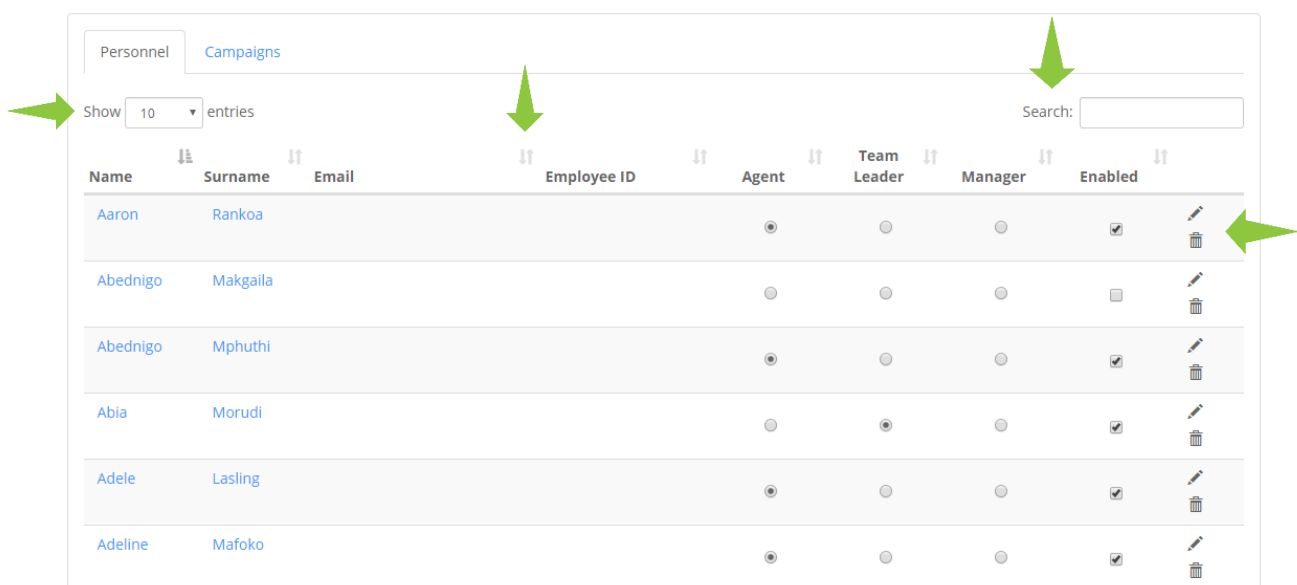

If there are captures you can remove the person from the lists by disabling that person.

All columns are sortable using the icon located on the right hand side of the headings on the table.

There is a Search option in the top right hand corner to narrow the entries in the table.

There is also a Show option in the top left hand corner to increase the entries on the table.

This is limited to a selection of 10, 20, 50 or 100 entries.

Campaigns View: Shows the basic detail per campaign in a table format including:

1. Campaign ID
2. Campaign Name
3. Number of active persons per role (Agents, Team Leader and Managers)
4. Active lists (Agents, Team Leader and Managers)

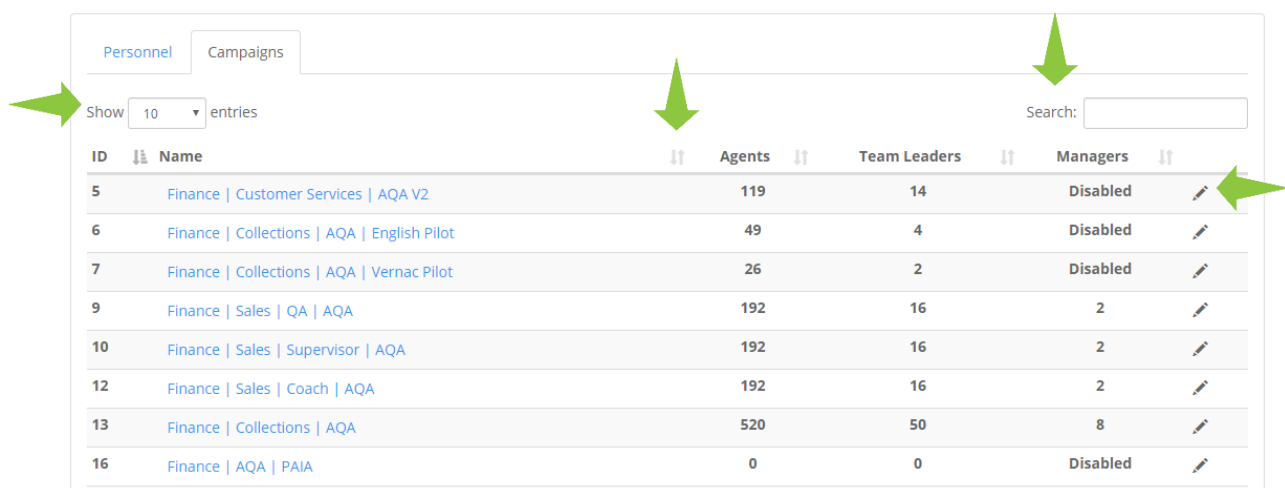

Clicking on the campaign name (blue script) or selecting the pencil on the right hand side of the table will allow you to edit the selected campaign. This is adding or removing staff from the selected campaign.

All columns are sortable using the icon located on the right hand side of the headings on the table.

There is a Search option in the top right hand corner to narrow the entries in the table.

There is also a Show option in the top left hand corner to increase the entries on the table.

This is limited to a selection of 10, 20, 50 or 100 entries.

The screenshot shows the 'Campaigns' tab in the interface. At the top left, there is a 'Show' dropdown menu set to '10' entries. At the top right, there is a 'Search:' input field. The table below has columns for 'ID', 'Name', 'Agents', 'Team Leaders', and 'Managers'. Each column header has a double arrow icon for sorting. The 'Name' column contains blue script links for each campaign. The 'Managers' column contains a 'Disabled' status and a pencil icon for editing. Green arrows point to the 'Show' dropdown, the 'Search' bar, the double arrow icons on the column headers, and the pencil icon in the 'Managers' column.

Add Personnel

Adding personnel can be done in two ways

1. Individual personnel can be added
2. Bulk updates can be done

Both function are accessible using the menu in the Personnel Management

Adding Individual Personnel

Select the Add Personnel button.

A side window will pop-up.

Name and Surname fields are compulsory. When they are empty as in the screen shot below, they will be encircled by red to indicate this condition.

The Employee ID is you company's allocated ID and not the unique id that will be allocated for this system.

Start date can be amended at this point.

However the Last Edit Date is auto populated.

The screenshot shows the 'Add Personnel' side window. On the left is a 'Personnel Management' sidebar with a 'Customer' dropdown set to 'Finance'. The main form has the following fields: 'Enter Name' (Name *) with a red border, 'Enter Surname' (Surname *) with a red border, 'Enter Email' (Email), 'Enter Employee ID' (Employee ID), '30-Mar-2020' (Start Date *) with a dropdown arrow, '30-03-2020' (Last Edit Date), and a role selection section with radio buttons for 'Agent', 'Team Leader', and 'Manager'. At the bottom is an 'ENABLED' toggle switch. On the right is a 'Campaigns' table with columns 'ID', 'Description', and 'Select All'.

The following columns will be found on this template.

1. Name
2. Surname
3. Employee ID (alphanumeric)
4. Email (email@example.com)
5. Start Date (dd/mm/yyyy)
6. Agent (True/False)
7. Team Leader (True/False)
8. Manager (True/False)
9. Enabled (True/False)

The same rules apply to bulk update that are applied to individual updates.

Below is an example of what your file should look like.

Note the error in row A9

	A	B	C	D	E	F	G	H	I	J
1	Name	Surname	Employee ID	Email (email@example.com)	Start Date (dd/mm/yyyy)	Agent (True/False)	Team Leader (True/False)	Manager (True/False)	Enabled (True/False)

Ensure that you last 4 columns are correctly filled in.

In the example, your first entry happens to be a team-leader, the second entry is a manager and the rest of the list are agents.

The order you put your staff in doesn't matter as long as your allocations of TRUE/FALSE are correct.

Once you have saved the file go back to the Import button and scroll down on the side pop-up to Choose File.

There are a few things to note in this export:

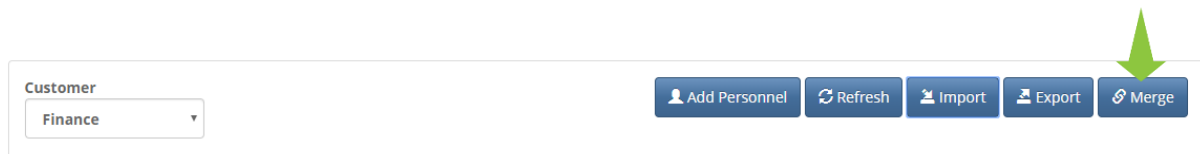

1. This is a consolidated view of both the campaigns I've selected. Therefore agents on both campaigns will only show once.
2. No campaign allocations will show here.
3. The list is sorted by Unique ID.

As noted above if you make changes to this file and try to do a bulk update you will get a error notification.

Merge Function

This function allows you to combine the data of two personnel in the event where one person was created twice.

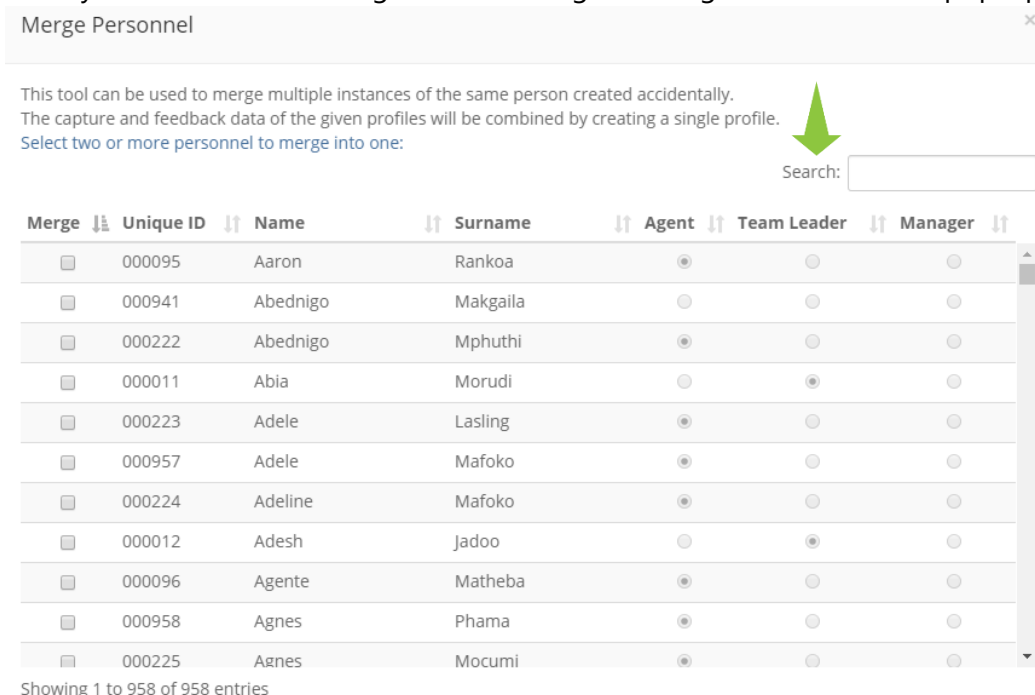

Example: with the previous list management system, name changes (surname updates) resulted in the data being distributed between the two names depending on the the time of the name update.

Customer: Finance

Buttons: Add Personnel, Refresh, Import, Export, Merge

Once you have selected Merge, the following following side window will pop-up

Merge Personnel

This tool can be used to merge multiple instances of the same person created accidentally. The capture and feedback data of the given profiles will be combined by creating a single profile. Select two or more personnel to merge into one:

☐ I understand that merging the selected profiles will combine their respective capture and feedback data across all campaigns.

Lets say Mpho got married and wanted her name updated on the app prior to People Manager.

Because we implimented this change she now shows up as 2 separate people on all reports, Mpho Polori and Mpho Ngobeni.

Karabo Mokobane	21	1	95.2 %	100.0 %	95.2 %	100.0 %	100.0 %	1	0
Mpho Ngobeni	5	1	80.0 %	100.0 %	80.0 %	100.0 %	100.0 %	5	0
Mpho Polori	24	5	79.2 %	95.8 %	79.2 %	100.0 %	100.0 %	16	0
Ndodenhle Dlamini	25	0	100.0 %	100.0 %	100.0 %	100.0 %	100.0 %	20	0

We can now combine the data under one name using the merge function.

We use the search function to reduce the list.

Add ticks to the agents we wish to merge and read the fine print before selecting merge.

Removing Personnel from the lists

There are two ways to remove personnel from the lists.

1. Disabling the personnel (Recommended)
2. Deleting the personnel – this can only be done if there is no data linked to this person.

You can do both from the Personnel table view.

Lets remove Fisiwe Thwala from the agent list on Customer Services
